

Invest in Tomorrow

Projects

Eliminating the Debt
Investing in Tomorrow

Project #1

WiFi & Network Upgrade

\$32K project + \$32K debt = \$64K total

- In today's culture having WiFi connectivity is not only needed but expected.
- It is imperative to have a facility that has complete signal coverage and the ability to handle the needs and desires of our church family.
- These improvements will give us the ability to stay current and meet the growing requirements of technology for our weekend services, events, and online.

Project #2

LED Wall and Light Fixtures

\$85K project + \$85K debt = \$170K total

\$10K – light fixtures

\$75K – LED wall

- Adding 8 programmable, moveable light fixtures to our lights system will greatly enhance our worship environment and will work better with a new lights board that we were able to purchase from the budget this year.
- Our current video projectors in the Worship Center are beyond life expectancy and need to be replaced. The south projector has a dark spot and is flickering, which are signs that it is about to fail. Technology has improved dramatically, and it would make the most sense to invest in an LED wall to replace both video projectors. The quality of the image of an LED wall is far superior to a video projector.
- Replaces existing screens that will no longer be needed.

Project #3

Camera, Lights and Studio

\$46K project + \$46K debt = \$92K total

- The Media Ministry continues to grow and has become a vital and effective ministry at Grace in sharing The Gospel.
- Having an on-site studio with the right equipment will be vital in creating relevant and high-quality content that will reach the 1.86 million people in King & Pierce County and around the world.
- Impacts the quality of “Live Streaming”.
- Provides higher quality of video content when recording offsite.

Project #4

Children’s Ministry Upgrade

\$77K project + \$77K debt = \$154K total

2/3 currently funded

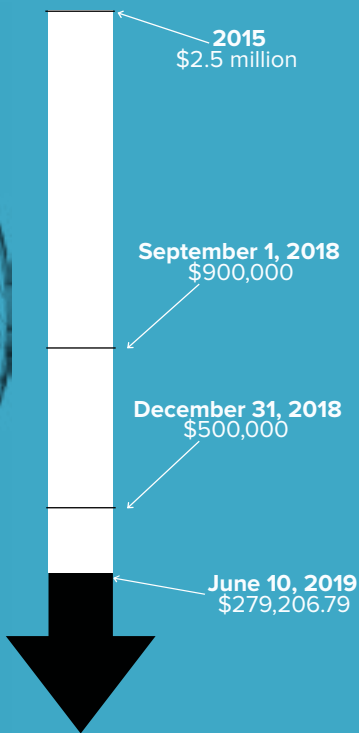

\$28K project + \$28K debt = \$56K remaining

- Grace Kids is now exclusively occupying our lower level.
- Our church is experiencing consistent and significant growth in the amount of young families that are attending.
- Creating a positive first impression is welcoming to families, inviting for kids, along with being safe & functional for everyone.

Upgrades include:

- Themed GK Entry/Lobby
- Painting/designing rooms
- Building counters that provide safety and drop off space for families.
