

The Trellis Project

bringing God glory. making disciples. sharing God's love.

Question Three

Why are we considering building amenities on the property and when will that happen?

As stated the Question 1 of this section, our vision for the new property is threefold:

1. Ensuring our ability to continuing to grow in the future (parking)
2. Facilitating the fellowship of our church family
3. Impacting the community with the gospel

While we know that we must provide additional parking space, we also know we don't need to pave the entirety of that new property.

Considering this, our leadership is asking the question of how we can use the balance of that property to fulfill the other two purposes listed above. We believe that by installing some amenities on that property, we can use it for the sake of our church and the advance of the gospel in ways that are compelling, unique, and vibrant. The cost of fully developing that property is not currently in Phase One. We will be pursuing this development in the future as the Lord provides us with the resources and we have the means for such projects.
