Practice Spiritual Warfare – A Cultivated Prayer Life

- **Spiritual Oppression / Warfare**

Eph. 6:10-12, 1 Pet. 5:8, John 10:10

Verse 12: *For we are not fighting against people made of flesh and blood, but against persons without bodies, the evil rulers of the unseen world, those mighty satanic beings and great evil princes of darkness who rule this world; and against huge numbers of wicked spirits in the spiritual unseen world.* (from the Living Bible – paraphrased)

IN CONCLUSION CONCERNING MINISTERING – REMEMBER:

Homosexuality is rooted in:

- Same Sex Parent Deficits
- Environmental Factors
 - Abuse • Family • Peers • Unhealthy Relating
- Lack of Nurture not Nature (not genetic)
- Lack of Mentoring
- Early Childhood Developmental Issues
- Perceptions and Identity Conflicts with Temperaments
- ARRESTED EMOTIONAL DEVELOPMENT

A Scientific Examination of Homosexuality and the “Gay Gene”

The transcripts were left at home and the papers were concealed. The press releases and campaign signs were quietly forgotten. The news was big, but it did not remain what some had hoped for. On April 14, 2003, the International Human Genome Consortium announced the successful completion of the Human Genome Project—two years ahead of schedule. The press report read: “The human genome is complete and the Human Genome Project is over.” One “Human Genome Report...” 2003, esp. added. Most of the major science journals reported on the progress in the field of genetics, but also speculated on how the information would soon be used. The one piece of information that never materialized from the Human Genome Project was the identification of the so-called “gay gene.”

Homosexuality has been practiced for thousands of years. Simply put, homosexuality is defined as sexual relations between like genders (i.e., two males or two females). It was Sigmund Freud who first postulated that parental relationships with a child ultimately determine the youngster’s sexual orientation. But the “nurture” aspect has effectively given way to the “nature” side of the equation. Can cause behaviors (e.g., alcoholism, homosexuality, schizophrenia) be explained by genetics? Are there and other behaviors influenced by nature or by nurture? Are they inherited or learned? Some individuals believed that the answer would be found hidden under the chromosomes analyzed in the Human Genome Project.

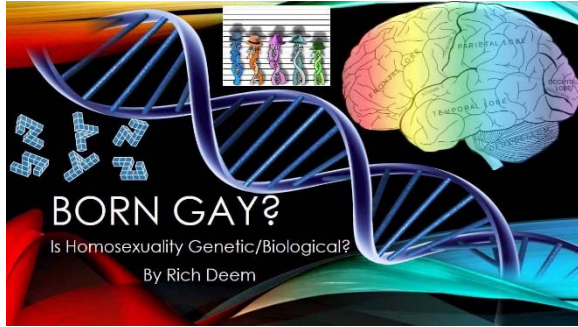

The human X and Y chromosomes (the two “sex chromosomes”) have been completely sequenced. Thanks

to work carried out by scientists across the globe, we know that the X chromosome contains 131 million base pairs, and harbors a total of 1168 genes (see NCBI, 2004). The National Center for Biotechnology Information reports that the Y chromosome—which is much smaller—contains “only” 50 million base pairs, and is estimated to contain a mere 551 genes. Educational institutions such as Baylor University, the Max Planck Institute, the Sanger Institute, Washington University in St. Louis, and others have spent countless hours and millions of research dollars studying these unique chromosomes. As the data begins to pour in, they allowed

Born Gay? Is Homosexuality Genetic/Biological? Video presentation on YouTube: <http://bit.ly/1newfq4>
Human Anatomy, Physiology, and Biology 101

Heterosexuality – we are designed anatomically correct for procreation – to create life – in the image of God to participate with Him to create life.

Physiologically – revealing how the brain functions with sexuality and the reproductive system – the design clearly reveals a heterosexual divine intent.

Biology 101 – reveals in the study of all living creatures that homosexuality is not viable and that ONLY heterosexuality produces life.

PREPARING TO MINISTER WITH COMPASSION

Are you a safe person?

Are you a secret keeper?

Are you compromising your own spiritual walk with God?

Are you loving a life of transparency and integrity?

Are you open about your own weakness – What does your sin look like?

Do you demonstrate real Christ-likeness / humility?
